Hi Wilo,

Thank you for checking in. It took some time to identify and find availability for those in OPP with historical perspective. We'll be meeting next week to align internally on how best to assist and will be in touch shortly thereafter. I've asked Cindy to be on point for this for FEAD and she can clarify or provide additional updates as appropriate.

Thanks,

Lance

Good morning Lance!

I just wanted to follow up on this issue while Jamie is out. Do you have any updates from your group on this topic?

Please let us know if it would be helpful to set up a call in the next couple of weeks to discuss further and/or to provide you and your team with additional information.

Thanks

Hi Jamie,

Thank you for the follow-up. We'll get in touch with our environmental fate folks to see what we can do. Feel free to check-in with Cindy or me with additional input or questions in the meantime.

Take Care,

Lance

Subject: Treated Seed and Ethanol Production

Hi Lance - Per our discussion a few weeks ago, I wanted to share the background on the issue we have regarding the production of ethanol using treated seed corn and questions we have received regarding options and the risks associated with pesticide residues found in the wet cake by product. As I had mentioned, the Regional Administrator recently received a letter from the heads of both NDA and NDEE requesting assistance in finding a solution to this ongoing challenge.

In follow-up several R7 programs participated in a conference call with NDEE and NDA to better understand the current status and it doesn't appear that a great deal has changed. They are concerned about the ongoing risks to both ground and surface water as well as other aspects of the long term on ground open air storage of the wet cake.

I have attached a word document with some background based upon recent discussions with the state as well as an e-mail string with older information that may be helpful. Some within OPP are already familiar with this issue as we discussed it with various people and exchanged e-mail with Mike Goodis about a year ago and more recently with Tom Steeger. This is a lot of information and more complicated than can be described here but I've tried to provide enough background to help those who might be unfamiliar with the issue get somewhat up to speed.

We're hoping OPP's expertise could provide some insights. To the extent you have thoughts of additional data or other needs the Region and/or state may need to better inform their decisions that would be helpful as well.

Ex. 5 Deliberative Process (DP)

NDEE has indicated that all of the sampling data can be found on their website at
<https://ecmp.nebraska.gov/publicaccess/viewer.aspx?&MyQueryID=340>

Simply fill in the range of dates you are interested and facility number 84069. The next 2 blanks don't need to be filled in.

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

appreciated! We can jump on a call ourselves or facilitate a call with NE to help walk through some of this. I will be out on leave for about two weeks beginning the 21st and have been asked to provide an update on what we have learned after I return so any initial insights before I leave or shortly after I return will be helpful.

In my absence, the following people would be helpful points of contact for arranging a call and/or questions: Wilo Rosado, Candace Bednar, and Erin Weekley.

Thanks for all of your help!

Jamie
